

Gang,

This years War Wagon lived up to its name. With just 12 Teams competing we made a longer course giving everyone more shooting. This match was a test of good communication with your driver as well as a test of endurance with your 3 guns.

This years extended course was the first 3 bays coming into the range, shotgun for a minimum of 34 rnds and 3 slugs. The next bay and all along the road to the SPPL container was 17 falling steel targets, 5 stationary steel, and 24 paper targets making @ 50-70 rounds of pistol not including misses. Last was the rifle shooting with targets before the SPPL container, after the container and all the way down the parking area making another 24 targets with 13 steel at the end including the dreaded plate rack at almost 100 yds. making rifle 50-70 rnds with no misses. Ryan Collins shot the most rounds with the timer counting 234 shots fired :-)

Only Don Ellis, Dave Thomson, and FAFB Chris Jackson shot the course without any time penalties.....needless to say this was not an easy course and especially with the road conditions being dug up from the FRGC recent power upgrade.

Don Ellis invited a woman out to shoot named Jessica. This was her first match (sure it was...) and she was not too familiar with a shotgun too. Yes, I am suppose tto tell all that she beat her husband, Wade, with a time of 452.43 and Wade was 454.17. First time? Jessica was 6th overall fastest time.....do not mess with this woman, she can handle a firearm! Next year lets try to get some woman and Junior Teams going....

Thanks to all who helped yesterday in taping, resetting steel, and picking brass and shotgun hulls. A special thanks to Lee Wilson who helped me set up all day Friday and stayed until the end on Saturday putting everything back. Below are the Team results and Top 10 single fastest runs.

Thanks again to one and all that make this once a year event possible and fun. With all the new FRGC Range improvements coming this year, I am starting to plan a course that will keep us on the rifle bay and use the road across the creek clear out to the 400 yd line.
